What is Powder Coating, and what are the benefits to you?

Powder Coating by Alpha Spray©

Powder coating is a type of dry coating, which is applied as a free-flowing, dry powder. The main differences between a conventional liquid paint and a powder coating is that the powder coating does not require a solvent to keep the binder and filler parts in a liquid suspension form. The coating is typically applied electrostatically and is then cured under heat to allow it to flow and form a "skin".

There are several advantages of powder coating over conventional liquid methods. It is usually used to create a hard finish that is tougher than conventional paint.

Powder coatings emit zero or near zero volatile organic compounds (VOC). Powder coating produces a much thicker coating than conventional liquid coatings without running and achieving 100% utilization of the coated area.

Alpha Spray Powder Coating is much safer for the environment than liquids.

Adding Value To Your Home

No detail is ever overlooked, from the handcrafted artistry of detailed scrolls to the classic wrought iron accents for that

distinctive touch and stunning style you expect .

Custom wrought iron will not only enhance the Beauty, Security, Safety in your home, it will also add True Market Value and charm.

At Reyes Ornamental Iron, we will sit down with you to design the look that you would like. Since we make create and fabricate your designs one at a time, we can keep a consistent artistic flow throughout your home, from your driveway gate, your front fences and gates with flowing railings, to your balconies and stairways.

Whether it be exquisite scroll designs to our fashionable "Bird of Paradise" floral look , we can design any look that you would like for your home or business!

Our Background and History at Reyes Ornamental Iron

Over 25 years experience in wrought iron design and fabrication. After graduating High School in general studies, Carlos moved on to the Peruvian Capital for further studies and a career in ornamental iron design. After showing an exceptional talent and skill while working with handcrafted metallic structures, and ornamental iron where he studied as an apprentice for an International Company dealing in ornamental iron, Carlos was soon moved up from apprentice to Master Craftsman.

Carlos later branched off to open his own shop in the Peruvian Capital as a small business owner creating "one of a kind" ornamental wrought iron art and

structures. His artistic designs and talents would soon be noticed around the world! Carlos was invited to Japan for five years to demonstrate and further develop his signature ornamental iron designs. After leaving Japan, Carlos opened another shop in Tustin, California where he now creates his custom ornamental iron designs at Reyes Ornamental Iron in the United States.

All of his work is Handcrafted to your specifications down to the last detail of design with nothing overlooked. His advanced studies, work and designs with iron is what one would call "The Art of

Wrought Iron Design".
